# Levi Huff

IT support and desktop support

contact@levihuff.net | levihuff.net | github.com/lh1207 | LinkedIn

Washington Court House, Ohio

IT graduate with prior enterprise support experience and recent customer-facing work at Kroger. Seeking help desk, IT support, desktop support, service desk, and endpoint support roles.

Local roles come first; Columbus is my preferred out-of-town market, and remote roles are welcome.

## EDUCATION AND CURRENT STUDY

**Bachelor of Science in Information Technology** | University of Cincinnati

Currently studying for CompTIA Network+.

## SUPPORT SKILLS

**Windows and hardware**: Windows support, hardware troubleshooting, imaging and deployment.

**Users and accounts**: Active Directory, onboarding, endpoint support, email support, and support tickets.

**Communication**: Customer service, on-site and remote user support, and onboarding documentation.

PowerShell | Hyper-V, AD DS, DNS and DHCP lab configuration | Docker Compose | Git

## EXPERIENCE

**Kroger | E-commerce clerk | Recent customer-facing experience**

Customer-facing work in e-commerce order fulfillment. This recent retail experience complements my earlier technical support roles.

**Tire Discounters | Infrastructure & Cybersecurity Co-op | August-December 2022**

Provided on-site and remote IT support during a co-op placement. Worked on support tickets and helped with employee onboarding and Windows workstation setup.

- Worked with Active Directory and PowerShell for account provisioning tasks.

- Assisted with Windows imaging using Microsoft Deployment Toolkit (MDT) and documented onboarding steps.

**Total Quality Logistics | IT Support Intern | January-April 2022**

Helped prepare Windows workstations and troubleshoot hardware during an IT support internship.

- Used PXE boot workflows for workstation imaging.

- Helped with equipment setup, moves, and preparation of retired hardware.

Additional experience: UC Conference & Event Services, event staff (2023-2024); UC RED Housing, desk assistant (2021).

## SELECTED TECHNICAL PROJECTS

**Windows and Active Directory lab** | Personal project
PowerShell scripts for Hyper-V setup, with recorded AD, DNS and DHCP configuration checks. github.com/lh1207/ad-pxe-lab

**AeroAssist** | Software project contributor
Added Docker configuration to an ASP.NET ticketing application. The source includes ticket API operations and SQL Server integration. github.com/lh1207/AeroAssist
